

Scheduled Maintenance Plans

Data Specification

June 2026

Overview

This dataset contains **316 scheduled maintenance plan entries** defining recurring maintenance activities at Valmet industrial sites. Each row specifies what activity is performed, how often, and how many hours are planned.

This is the **reference dataset for scheduled work** — the PM_NO field links to PM_NO in the work orders dataset, connecting work order executions to their parent plan.

Language: Descriptions are bilingual (Finnish + English). No anonymization required.

File Details

Property	Value
Filename	Scheduled maintenance plans.csv
Format	CSV (UTF-8 with BOM)
Rows	316
Columns	22

Sites & Contracts

Customer	Site	Contract	Count
Valmet Technologies Oy	Lentokentänpäätie 11, Tampere	KH + KT	177
Valmet Flow Control Oy	Venttiilitehdas, Vantaa	KH + KT	138
Valmet Flow Control Oy	STD tehdas, Vantaa	KH	1

Only KH (Property maintenance) and KT (Technical services) have scheduled plans. Cleaning (SP) and Facility services (KIPA) are not represented.

Column Reference

Identifiers & Location

Column	Type	Null?	Description
PM_NO	Integer	No	Maintenance plan number. Links to PM_NO in work orders. 106 unique plans.
MCH_CODE_CONTRACT	Categorical	No	KH (Property maintenance, 162) or KT (Technical, 154)

Column	Type	Null?	Description
CUSTOMER_WORKSITE_NO	Text	No	Worksite ID. Shared key with work orders.
CUSTOMER_NO	Integer	No	Customer number in Luotea's ERP
customer_name	Text	No	Customer company name
CUSTOMER_SITE_NO	Integer	No	Site identifier
customer_site_name	Text	No	Site name
site_address	Text	No	Physical address

Activity Definition

Column	Type	Null?	Description
ACTION_DESCR	Text	No	Activity name in Finnish (50 unique)
ACTION_DESCR_ENG	Text	No	Activity name in English (50 unique)
DESCRIPTION	Text	Yes (17%)	Detailed task description in Finnish
DESCRIPTION_ENG	Text	Yes (17%)	Detailed task description in English
PLAN_HRS	Decimal	Yes (13%)	Planned hours per execution. Range: 0.08–160.00

Scheduling

Column	Type	Null?	Description
INTERVAL	Integer	Yes (28%)	Numeric interval (combined with PM_INTERVAL_UNIT)
PM_INTERVAL_UNIT	Categorical	Yes (28%)	Day (24), Week (12), Month (30), Year (163). NULL = no fixed schedule.
PRIORITY_ID	Integer	No	Priority: 2 (18), 3 (144), 5 (154)
START_DATE	Datetime	Yes (28%)	First scheduled execution date

Status & Timestamps

Column	Type	Null?	Description
OBJSTATE	Categorical	No	Active (198) or Obsolete (118). Only Active plans generate work orders.
VALID_FROM	Datetime	Yes (1%)	Date from which the plan is/was valid
REV_CRE_DATE	Datetime	No	Revision creation date
LAST_CHANGED	Datetime	No	Last modification timestamp
LAST_UPDATED	Datetime	No	Last data export/sync timestamp

Planned Hours Distribution

Hours range	Plans	Typical tasks
0.08–0.66	39	Quick tasks (flag raising, meter reading)
1.00–2.00	111	Standard maintenance tasks
3.00–5.00	24	Medium tasks
8.00–10.00	12	Half-day to full-day tasks

Hours range	Plans	Typical tasks
21.00	3	Multi-day tasks
104.50–160.00	36	Dedicated facility technician assignments

Key Relationships

To Work Orders: PM_NO → PM_NO in work_orders_anonymized.csv. Each Active plan generates recurring work orders (WORK_ORDER_TYPE = 'EH-työ').

To Sites: CUSTOMER_NO + CUSTOMER_SITE_NO + CUSTOMER_WORKSITE_NO shared across all datasets.

Notes for Participants

1. **Duplicate rows exist.** Same PM_NO appears multiple times (typically 3×). Deduplicate by PM_NO.
2. **OBJSTATE matters.** Only Active plans (63%) generate work orders. Obsolete plans are historical.
3. **NULL intervals** = no fixed recurrence (e.g., seasonal/on-demand work).
4. **PLAN_HRS** is budgeted time per execution, not total annual hours.
5. **Encoding:** UTF-8 with BOM.
6. **Filename** contains a typo ('maitenance') — matches the source file.
